## Why HCC?

**Customized technology solutions.** We empower clients with a single-source comprehensive range of efficiency-building solutions to meet needs ranging from **small, single-site** entities to **large multi-site** organizations with thousands of employees.

**Worry-free efficiency.** We provide the **highest levels of service** to ensure you the peace of mind you want and deserve, **responsive to today's challenges** and proactive problem-solving for tomorrow.

**Low rates.** As a public entity, **with no profit motive**, HCC's rates are often less expensive than many commercial rates.

**World-class security and backup.** In early 2016 we're moving our servers to the **State of Ohio Supercomputer Center (SOCC)** in Columbus, the same site that houses Ohio State, University of Cincinnati, Cuyahoga County, and many more who need the best in security for their most sensitive data.

**World-class transport.** We are connected directly to OARnet, Ohio's two thousand-mile **public fiber network** which links education, health care, public broadcasting and government communities, thereby lowering broadband access cost.

## About HCC

Formerly known as the Hamilton Clermont Cooperative Association, HCC was created by the Ohio legislature. HCC has been providing worry-free technology services to public school districts, nonpublic schools, governmental entities, and nonprofits throughout SW Ohio since 1980. The majority of our clients have been with us since our inception.

### Support Your Local Public Schools

HCC is **owned and governed by public school districts** in SW Ohio. When you work with HCC, you are helping us help your local school district. Unlike commercial providers, HCC reinvests every nickel to ensure that public dollars are being used to support you and your public schools.

Your Partner For  
Worry-Free Efficiency

Let us serve you the way we serve so many others.
