

How does the W2 Abbreviation entered on the Payroll Item Configuration screen in USPS-R appear on a W2 Form?

In this example, the entry in the W2 Abbreviation field is too long for the W2 Form, which will only include the first 6 characters.

Type OsdiTax	Code 810	Name OSDI Cincinnati
abbreviation OSDI Tax	W2 abbreviation 1303/CINCI	Payment Cycle Monthly

The abbreviation populates box 20 on the W2:

20 Locality name 1303/c

Considering this, please make sure a W2 Abbreviation entry has the OSDI number first.

Also please consider omitting any punctuation. For the above example, an entry such as **1303CI** may be preferable, as it would be fully included on the W2 form.
